

Enterprise Mobility Solutions For Today's Connected World

MiT Systems delivers the most advanced and affordable **Mobile Enterprise Solutions** designed to improve performance and profitability. The comprehensive suite of enterprise, distribution and mobile solutions meet the mission-critical needs of the distribution industry by enabling them to effectively and efficiently manage **ordering, distribution, delivery, payment and inventory operations.**

Through a unique configurable building block approach, MiT delivers highly configurable, flexible and scalable software solutions which allow the distribution industry to implement one module at a time or a complete end-to-end package. The system will grow and evolve as your business does.

MiT Systems Advantages:

Highly Configurable Build Blocks – Enterprise, distribution and mobile solution building blocks enable customers to deploy complete supply chain solutions that are designed specifically for their sales and distribution operations.

Real-Time Visibility – Access to inventory visibility, real-time ordering & communications to make informed decisions and eliminate the need for manual processing.

Mobile Workforce Traceability - Remotely manage and trace your mobile workforce throughout their daily tasks — in real-time.

Proven Technology – MiT software solutions are tested and certified on the Microsoft Windows Mobile 6.1 platform and are deployable on any mobile device available today.

MiEzSales Enterprise Mobility™ Solutions

Through advanced technologies, MiT's suite of enterprise mobility solutions provide your team with the right tools for the job at hand. MiT solutions integrate the following features to empower your mobile workforce:

- > **Configuration engine** allows for a tailored solution to meet the unique needs of your businesses.
- > **Windows Mobile testing and certification.** MiT has the only solution in the distribution marketplace to pass rigorous testing and certification by Microsoft.
- > **Real-Time Communication** ensures the warehouse and mobile workforce are always up-to-date with the latest information.
- > **Simple User Interface** allows users to be up and running in minutes with minimal training.

MiT's enterprise mobile portfolio includes the following key functional areas:

- > **Pre-sales Ordering**
- > **Full Service Delivery**
- > **Inventory Control**
- > **Proof of Delivery**
- > **Advanced Data Capture**
- > **Asset Tracking**

MiEzSales Enterprise™ Solutions

MiT's enterprise solutions are designed to supplement our customers current enterprise applications by eliminating the gap between the requirements needed to manage a mobile workforce and the current functionality available in their enterprise solution. This approach enhances the overall solution, while minimizing customization and costly interfaces. Some of these enterprise modules include:

- > **Route Accounting & Settlement** allows users to account for route activities and rapid reconciliation of the day's transactions, cash collections and inventory movements.
- > **Inventory Management** enables management of inventory within the companies four walls as well as pricing levels.
- > **Order and Personnel Management** automates management of customer orders and the allocation of company personnel.

MiEzSales Dispatch™ Solutions

Managing your distribution channel is a complex challenge that can quickly eat away at your companies profits if not properly managed. Through MiT's Dispatch solutions customers can quickly take control of and manage their distribution channel. Dispatch modules include :

- > **Route Optimization** allows users to quickly optimize delivery routes to ensure timely and efficient deliveries.
- > **Drag and Drop Route Consolidation** allows users to easily consolidate and break up routes and delivery orders to ensure the most efficient movement of your product.
- > **Dispatching** allows users to quickly consolidate loads and produce electronic or manual load sheets to assist personnel with efficiently dispatching your vehicle fleet.
