

Enterprise Mobility & Route Accounting Solutions For Dairies

MiT

Systems delivers the most advanced and affordable **Mobile Enterprise** and **Route Accounting Solutions** designed to improve the performance and profitability of dairies. The comprehensive suite of Solutions meets the mission-critical needs of dairies by enabling them to effectively and efficiently manage **ordering, delivery, payment** and **route accounting operations**.

Through a unique configurable building block approach, MiT delivers highly configurable, flexible and scalable software solutions which allow dairies to implement one module at a time or a complete end-to-end package. The system will grow and evolve as your business does.

MiT Systems Advantages:

Highly Configurable – As business grows and processes change modules can be added on an as-needed basis.

Proven Technology – MiT software solutions are tested and certified on the Microsoft Windows Mobile 6.1 platform and are deployable on any mobile device available in the market today.

Real-Time Environment – Access to inventory visibility, real-time ordering & communications to make informed decisions and eliminate the need for batch processing.

Unmatched Flexibility – MiT solutions fit into any dairy's environment whether you have 20 routes or 2,000 routes.

MiT EzSales Mobile® Enterprise Mobility

Through advanced technologies, MiT's suite of enterprise solutions provides your team with the right tools for the job at hand. MiT solutions integrate the following:

- > **Configuration Engine** allows for a tailored solution to meet each business's unique needs.
- > **Windows Mobile Testing and Certification.** MiT has the only solution in the dairy marketplace to pass rigorous testing and certification by Microsoft.
- > **Real-Time Communication** ensures the warehouse and mobile workforce are always up-to-date with the latest information.
- > **Simple User Interface** allows users to be up and running in minutes with minimal training.

Full Service (Order & Delivery) Sales

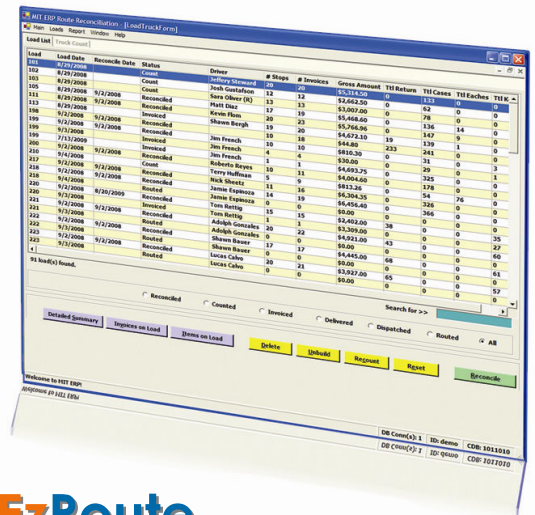

MiT delivery solutions ensure customers receive clean invoices while maintaining route accountability & eliminating paper management.

- > **Delivery Schedule Management**
- > **Route or Customer Level Orders**
- > **A/R & Payment Receipt**
- > **Signature Capture**
- > **Data Capture**

The Bottom Line

MiT solutions reduce overall costs, increase operational efficiency, enhance customer satisfaction and boost profits – all while providing drivers and back-office staff with a steady flow of information needed to perform their jobs.

MiT EzRoute Accounting™ Solutions

In a world of instant communication MiT EzRoute Accounting System (MiT EzRAS) provides your team with real-time information to make accurate decisions. Through its various modules MiT EzRAS boasts the following features:

- > **Advanced Route Settlement:** Route audit and settlement is accomplished efficiently while providing visibility to the status of every delivery vehicle in the fleet.
- > **Real-Time Order Management:** Managing order and production requirements to meet demand is the life blood of any dairy. With MiT EzRAS, orders are received in real-time to ensure production cut-off times are met. Standing orders can be used at either route or store levels to assist with production needs.
- > **Customer Management & Scheduling:** Powerful tools allow your team to understand your customers' needs and buying habits.
- > **Digital Invoices:** Instant access to digital invoices received from the mobile workforce eliminates paper and storage costs.
